

Replication Package for: The Church as Arbiter

February 2025

This replication package accompanies Boix and Lacroix. (forthcoming). “The Church as Arbiter”. Journal of Politics.

Authors

Boix Carles, Princeton University. Lacroix Jean, Université Paris Saclay.

Data availability and provenance statements

Statement about rights

The author(s) of the manuscript have legitimate access to and permission to use the data used in this manuscript.

Summary of availability

- All data are publicly available.

Details on each data source

All raw data are stored in the folder `Data/Original`. The sources of this data are described in Online Appendix D.

Shapefiles:

- “`Maps/Shapefiles/DEPARTEMENTS_1919.shp`” is a shapefile of US counties (Source: Gay, V., 2021).

Original data from this study

- `Commune.dta` is the dataset at the Commune-level.
- `Canton.dta` is the dataset at the Cantonal-level.
- `Diocese.dta` is the dataset at the Diocese-level.
- `Departement.dta` is the dataset at the Departement-level.

For Map Construction

- `Maps/Shapefiles/Branches.shp` is a shapefile of French communes centroids with a variable indicating whether a commune had branches both before and after 1926.
- `Maps/Shapefiles/Branches_PermanencePost.csv` is a text file with French communes centroids and a variable indicating whether a commune had branches after 1926.
- `Maps/Shapefiles/Branches_PermanencePre.csv` is a text file with French communes centroids and a variable indicating whether a commune had branches before 1926.
- `Maps/Shapefiles/Branches_PermanencePre.csv` is a text file with French communes centroids and variables indicating the number of AF meetings in 1925, 1926, 1927 and 1928.

Dataset list

All these originals datasets appear in the folder `Data/original`.

Data file	Source	Notes	Provided
Commune.dta	Authors	As per terms of use	Yes
Canton.dta	Authors	As per terms of use	Yes
Diocese.dta	Authors	As per terms of use	Yes
Departement.dta	Authors	As per terms of use	Yes
Maps/Shapefiles/DEPARTEMENTS_1919.shp	Gay V. (2021)	As per terms of use	Yes
Maps/Shapefiles/Branches.shp	Authors	As per terms of use	Yes
Maps/Shapefiles/Branches_PermanencePost.csv	Authors	As per terms of use	Yes
Maps/Shapefiles/Branches_PermanencePre.csv	Authors	As per terms of use	Yes

Computational requirements

Software requirements

- Stata (code was last run with version 18)
- QGIS 3.36 Maidenhead.

Memory and runtime requirements

Summary Approximate time needed to reproduce the analyses on a standard desktop machine: 20 min.

Details The code was last run on a HP Elitebook x360 1030 G8 Notebook with 11th Gen Intel(R) Core(TM) i7-1185G7, running Windows 11 Professional.

Description of programs/code

All codes are in the `Code` folder. Codes are organized in two subfolders: `Preparation` and `Results`. A `Master` dofile runs first the `Preparation` dofiles and then the `Results` dofiles.

The folder `Map` contains a QGIS project and necessary shapefiles to produce the Maps in Figure 3 and Appendix Figures B.1.

In the folder `Preparation`:

- `1.Preparation Commune_data` defines variables and prepare the dataset at the communal level.
- `1.Preparation Canton_data` defines variables and prepare the dataset at the cantonal level.
- `1.Preparation Departement_data` defines variables and prepare the dataset at the departemental level.
- `1.Preparation Diocese_data` defines variables and prepare the dataset at the diocese level.

In the folder `Results`:

The codes produces the output of the Main text and of the Online Appendix. Codes `Table1a.do` to `Table5.do` produce the Tables of the main text. Codes `Figure2.do` to `Figure8.do` produce the Figures of the main text. Codes to produce the Figures in Appendix are denominated with the letter and the number of the

Appendix. Codes starting by `App_Figure` produce Figures in Appendix. Tables output are stored in the folder `Results/Tables`. Figures are stored in the folder `Results/Figures` both in png and pdf format.

Maps are produced from the QGIS project in the `Maps` folder.

In details, output in the main text is produced as follows. - `Code/Results/Table1a.do` produces the first panel of Table 1. - `Code/Results/Table1b.do` produces the second panel of Table 1. - `Code/Results/Table2.do` produces the Table 2. - `Code/Results/Table3.do` produces the Table 3 - `Code/Results/Table4.do` produces the Table 4. - `Code/Results/Table5.do` produces the Table 5. - `Code/Results/Figure2.do` produces Figure 2. - `Code/Results/Figure4a.do` produces Figure 4a. - `Code/Results/Figure4b.do` produces Figure 4b. - `Code/Results/Figure4c.do` produces Figure 4c. - `Code/Results/Figure5a.do` produces Figure 5a. - `Code/Results/Figure5b.do` produces the Table 5b.

In details, output in the Online Appendix is produced as follows. - `Code/Results/TableA1.do` produces Table A1. - `Code/Results/TableA2a.do` produces the first panel of Table A2. - `Code/Results/TableA2b.do` produces the second panel of Table A2. - `Code/Results/TableA2c.do` produces the third panel of Table A2. - `Code/Results/TableA3a.do` produces the first panel of Table A3. - `Code/Results/TableA3b.do` produces the second panel of Table A3. - `Code/Results/TableA3c.do` produces the third panel of Table A3. - `Code/Results/TableA4.do` produces Table A4. - `Code/Results/TableA5.do` produces Table A5. - `Code/Results/TableA6.do` produces Table A6. - `Code/Results/App_FigureB2.do` produces Figure B2. - `Code/Results/App_FigureB3.do` produces Figure B3.

Instructions to replicators

To produce Tables and Figures using the Stata. - Adjust the default paths by editing the path setting command in `Masterdofile` to the path of the replication package (“XXXX” appearing in line 10 and 11 in `Replication package/Code`).

- Ensure that the Folders located in `Replication package/Results` are empty. - Run the `Replication package/CodeMaster.do`.

To produce the maps (Figure 3 in the text and Figures B1), open the QGIS project `Mapsin` the folder `Replication package/Maps`. You can click on the different layers to produce maps. - To produce Figure 3 in the main text, select the layers `DEPARTEMENTS_1919`, `Branches`, `Branches_before` and `Branches_after`. You can edit the map by `Creating a New Print Layout` in the Project Menu. - To produce the different Figures B1, unselect the different `Branches`, `Branches_before` and `Branches_after` layers. Then select the `Meetings` layout and then right click on the layer to select Properties, then go to Symbols. You can then use `Categorize` and select `Meetings_YYYY YYYY` being the year of interest. Click then on `Classify`, `Apply` and `Unselect Observations` with either 0 or no value. You can then produce a Map using `Creating a New Print Layout`. Repeat the operation for the different years.

Details

- As codes run, the folder `Data/Generated data` will contain the datasets saved from the different codes.
- All outputs will be saved in the folders `Results/Figures` in pdf and png format and `Results/Tables` in tex format. # List of tables and figures The provided code reproduces:
- All tables in the paper as well as Figures (except Maps – Figure 3 and Figures B1).

The Figures and Tables in the main text are obtained as follows:

Figure/Table #	Program	Output file
Table 1	<code>Code/Results/Table1a.do</code>	<code>Results/Tables/Table1a.tex</code>
	<code>Code/Results/Table1b.do</code>	<code>Results/Tables/Table1b.tex</code>
Table 2	<code>Code/Results/Table2.do</code>	<code>Results/Tables/Table2.tex</code>
Table 3	<code>Code/Results/Table3.do</code>	<code>Results/Tables/Table3.tex</code>
Table 4	<code>Code/Results/Table4.do</code>	<code>Results/Tables/Table4.tex</code>

Figure/Table #	Program	Output file
Table 5	Code/Results/Table5.do	Results/Tables/Table5.tex
Figure 2	Code/Results/Figure2.do	Results/Figures/Figure2.png/pdf
Figure 3	QGIS Project Maps	TBD
Figure 4	Code/Results/Figure4a.do	Results/Figures/Figure4a.png/pdf
	Code/Results/Figure4b.do	Results/Figures/Figure4b.png/pdf
	Code/Results/Figure4c.do	Results/Figures/Figure4c.png/pdf
Figure 5	Code/Results/Figure5a.do	Results/Figures/Figure5a.png/pdf
	Code/Results/Figure5b.do	Results/Figures/Figure5b.png/pdf
Figure 6	Code/Results/Figure6a.do	Results/Figures/Figure6a.png/pdf
	Code/Results/Figure6b.do	Results/Figures/Figure6b.png/pdf
Figure 7	Code/Results/Figure7.do	Results/Figures/Figure7.png/pdf
Figure 8	Code/Results/Figure8.do	Results/Figures/Figure8.png/pdf

The Figures and Tables in the online Appendix are obtained as follows:

Figure/Table #	Program	Output file
Table A1	Code/Results/TableA1.do	Results/Tables/TableA1.tex
Table A2	Code/Results/TableA2a.do	Results/Tables/TableA2a.tex
	Code/Results/TableA2b.do	Results/Tables/TableA2b.tex
	Code/Results/TableA2c.do	Results/Tables/TableA2c.tex
Table A3	Code/Results/TableA3a.do	Results/Tables/TableA3a.tex
	Code/Results/TableA3b.do	Results/Tables/TableA3b.tex
	Code/Results/TableA3c.do	Results/Tables/TableA3c.tex
Table A4	Code/Results/TableA4.do	Results/Tables/TableA4.tex
Table A5	Code/Results/TableA5.do	Results/Tables/TableA5.tex
Figures B1	QGIS Project “Maps”	TBD
Figure B2	Code/Results/App_FigureB2.do	Results/Figures/FigureB2.png/pdf
Figure B3	Code/Results/App_FigureB3.do	Results/Figures/FigureB3.png/pdf

Tables 1, A2, A3 adds the results obtained in different output in different panels. Panels are denoted a,b,c.
